

# Bushland Update Term 1

## Weeding and Seeding Jobs

This year we will carry out a big revegetation project along the border of the bushland and around the new building, and students have already been busy!

**Pre-primary** have been weeding fleabane in the playground, and collecting dry leaves for mulch to improve some garden areas near their classrooms.

**Lower Primary** are making seed bombs with the native seeds collected by students last year, to place in the bushland and garden beds - we hope they will sprout when the rain begins!

**Upper Primary** used smoke granules and hot water to prepare the seeds for the seed bombs.

**Secondary** students removed a pepper tree and olive trees to prevent them invading the bushland. They will also help with weeding and planning the revegetation planting for areas disturbed by the construction site.

## What next?

The bushland sub-committee is organising hundreds of little baby plants.

*The whole school will be involved in a planting day in June!*

Marri trees are having a bumper flower season this year, through Birak and Bunuru
